## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the filing of 23 August 2005.

The application has been amended as follows:

#### **In the Title:**

The title has been changed to: "Retardation compensation system and liquid crystal projector with different compensation for one of the primary colors".

**End of examiner's amendment.**

### ***Allowable Subject Matter***

2. Claims 12 and 14-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of claims 12 or 14, in particular the limitation that the inorganic retardation compensator for the primary color light with the

Art Unit: 2871

shortest wavelength has a different thickness in the direction of the optical axis of the respective liquid crystal device from the other retardation compensator(s). For instance, *Weber* discloses, instead, that the fraction of component layers 16 and 18 which make up its inorganic compensators is responsible for the different retardations, so there is no teaching that the overall thickness of the compensators should be the physical dimension which is varied between the different compensators. Claims 12 and 14 are therefore allowed, as are their dependent claims, 15-19 and 20, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
